

About Us

Source Electric is an independent electrical contractor operating in the Greater Victoria area. Our expertise spans all aspects of power system design installation and energization. Our class A Journeymen electricians are qualified for both Industrial/ Commercial and residential installations at all voltage levels.

In addition to installation, commissioning and repair of electrical systems, Source Electric offers extensive experience in lighting design, electric floor heating systems, off grid systems, and overall ergonomic considerations of electrical installations. Through our own Engineering resources we are able to provide P.Eng certified solutions for the more unique problems and designs. As a innovative solutions provider we also provide expertise in the latest “smart” power and wireless systems and devices.

From the most innovative smart building to installing the new bathroom plug, our aim is to ensure maximum customer satisfaction and minimize callbacks. Our overriding philosophy is to apply quality solutions to all stages of a project.

Source Electric is a member of the BC Hydro Power Smart Alliance. As a qualified energy experts, we are able to assist customers working in the commercial and industrial sectors on how best to use energy-related systems and products. We also help identify energy-saving opportunities.
